

- A URL to your final viz or data story on Tableau Public

https://public.tableau.com/views/UNDPanalysis/Story1?:language=en-GB&publish=yes&:display_count=n&:origin=viz_share_link

(MAKE SURE YOU USE FULL SCREEN TO VIEW THE STORY SO IT WILL FIT BETTER IN YOUR SCREEN)

- A write up highlighting three specific design choices you made in light of your audience, and an explanation of why you made those choices
 1. I tried to use basic charts and basic visualisation and used texts instead of just numbers because of presenter , since she was not great with the stats and numbers.
 2. I used dual axis on bar chart to show how much countries are close to their expected years of learning. This serve as a KPI for countries.
 3. I added annotations and texts boxes around the visuals to keep updated audience that what is going on that particular visual.
 - 4.
- Your original project proposal with a short reflection on how your final project compares to your original project proposal. Did your plan change? What did you notice or learn during the process?

My original project proposal was to analyse the HDI of all countries and their metrics and to present the outcome to UNDP website for all countries to get a more detailed analysis on their respective countries HDI and metrics . So my final also remained the same purpose , there was no change . I learnt some new functions of tableau , how to do explanatory analysis and how can we present the data in more good way.
